Yarn & Finishing

# HYBRID\_

High performances

**CT** NASSAU  
Tape, Jacquard And Stretch Ticking

NATURAL + TECHNICAL

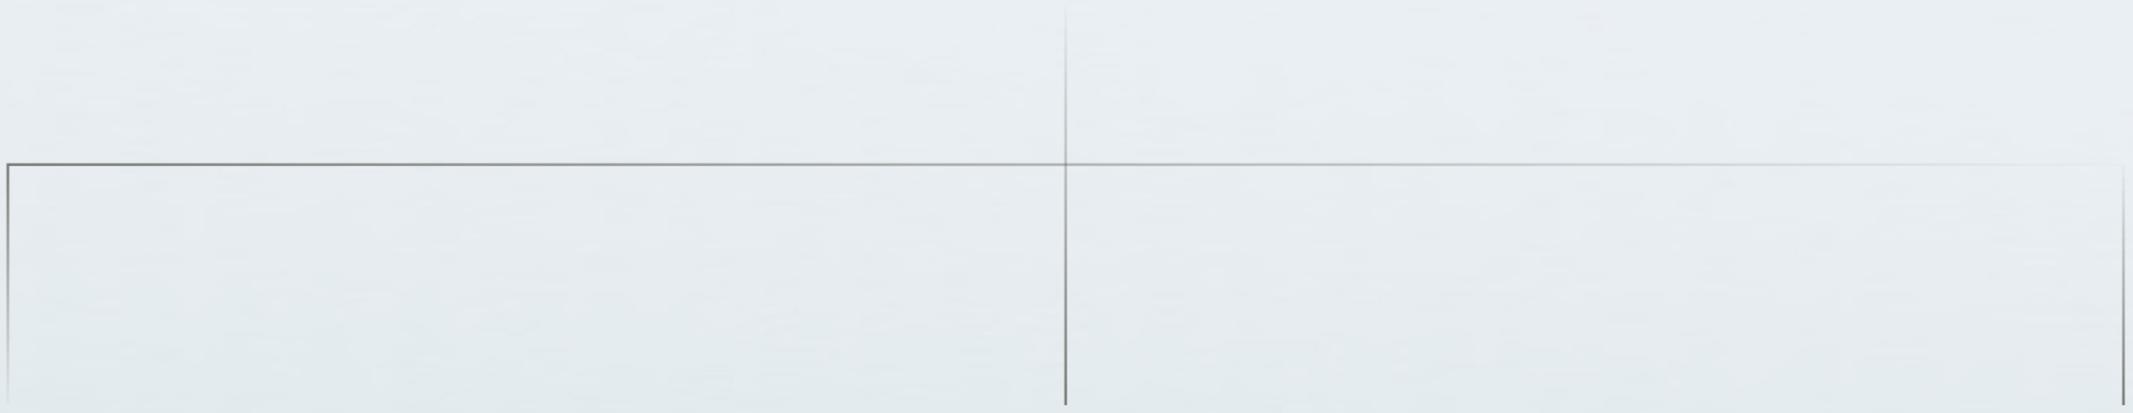

# A New Balance

Hybrid qualities are produced with a mixture of natural yarns and technical yarns. The balance between these elements confers to the fabrics better performances.

# THE CONCEPTS

Fabrics with a maximum array of functions that can be used in a wide variety of applications due to their good specific properties and limited environmental impact.

## HYBRID\_01

Linen + FRECC!

---

The cooling Hybrid

## HYBRID\_02

REstore + BioTune

---

The healthy Hybrid

## HYBRID\_03

Bamboo + ReUSE

---

The renewable Hybrid

# HYBRID\_01

Linen + FRECC!

## LINEN FABRIC + COOLING EFFECT

The natural freshness of linen masterly blended with a unique cooling yarn that thanks to its high thermal conductivity dissipates faster the excess body heat.

## PROPERTIES

Thermo-regulator

Moisture Management

Breathable

Non-stop performance

Resistant over time

Washable

# HYBRID\_02

## Restore + Biotune

### BIOCERAMIC + ANTIRADIATION PROPERTIES

The solution which helps to protect our body.

**RESTORE**, made up with bioceramic yarn, absorbs body heat, turn it into far infrared light (FIR) and send it back to the body tissue and muscles, increasing circulation and oxygen. **BIOTUNE**, made up with BioSynth technology, give it better resistance to electromagnetic pollution.

### PROPERTIES

Thermo-regulator  
Hybrid

Breathable

Soft to the touch

Non-stop performance

Antistatic

Washable

Resistant over time

# HYBRID\_03

Bamboo + ReUSE

## BAMBOO AND RECYCLED YARN

Featuring the techno natural blend. The recycled polyester yarn mixed with the natural properties of the bamboo.  
A trendy concept for a low environmental impact fabric.

## PROPERTIES

Eco-friendly

Anti-mold

Antibacterial

Soft to the touch

Anti-odour

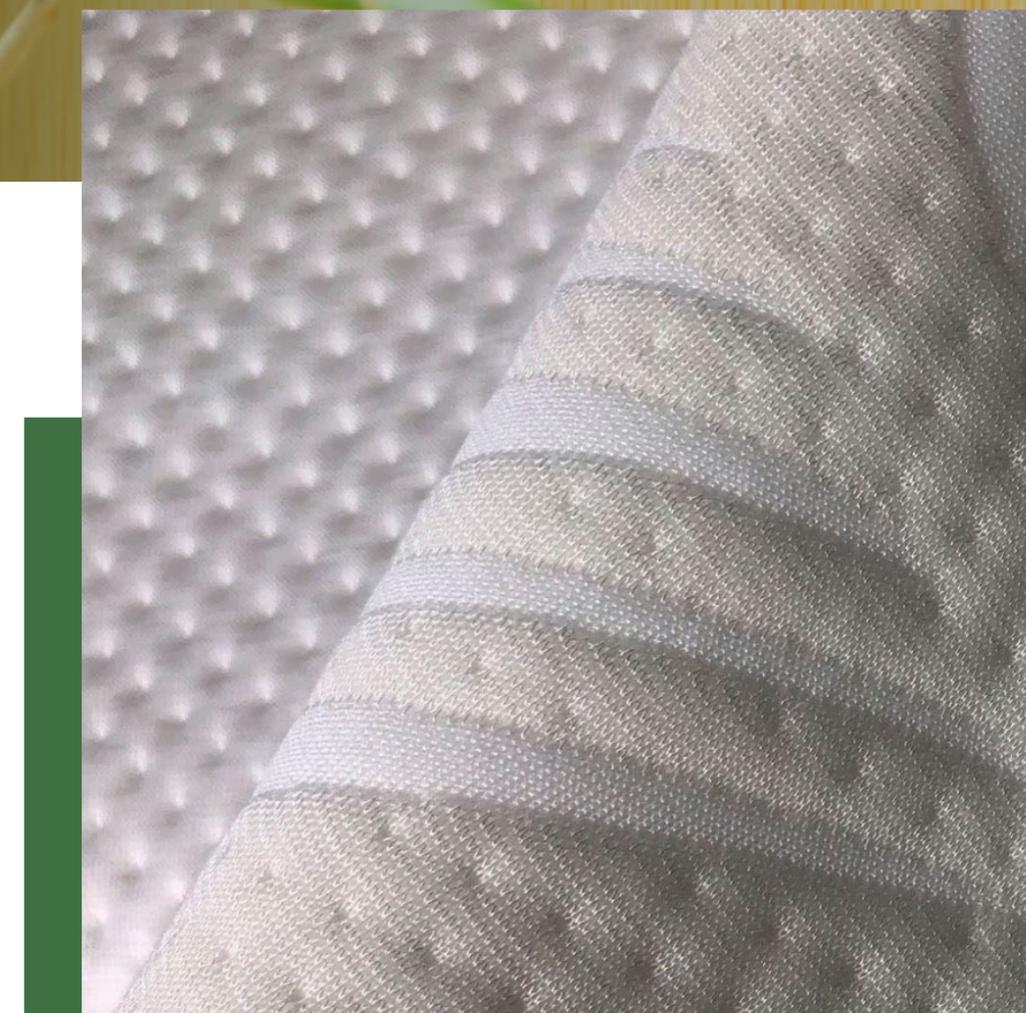

Breathable

Resistant over time

Non-stop performance
